WIDA English Language Development Standards Framework, 2020 Edition

Kindergarten—Grade 12

These materials are part of the WIDA ELD Standards Framework, 2020 Edition. The 2020 Edition offers several resources to support applications of the Framework, including materials that are geared specifically for grade-level clusters K, 1, 2-3, 4-5, 6-8, and 9-12.

The complete 2020 Edition includes other useful resources for educators. Section 4, in particular, includes

• Key Language Uses: A Closer Look
• Collaborative Planning for Content and Language Integration: A Jump-Off Point for Curricular Conversations
• A glossary of linguistic terms in the 2020 Edition

Moreover, eight appendices offer valuable information for specific purposes and audiences

• Appendix A: WIDA English Language Development Standards Framework, 2020 Edition—Meeting ESSA Title 1 Requirements
• Appendix B: Correspondence Tables for Content and Language Standards
• Appendix C: A Compilation of K-12 Key Language Use Distribution Tables and Language Expectations
• Appendix D: A Compilation of K-12 Proficiency Level Descriptors, with Technical Notes
• Appendix E: High-Level Comparison of WIDA Standards Editions From 2004 to 2020
• Appendix F: Theoretical Foundations of the WIDA ELD Standards Framework, 2020 Edition
• Appendix G: Select References
• Appendix H: Standards Development Process and Acknowledgments

To download a complete copy of the WIDA English Language Development Standards Framework, 2020 Edition, visit the WIDA website at wida.wisc.edu/teach/standards/eld. Or, you can buy a print copy from the WIDA Store, at www.wceps.org/Store.
Welcome to the WIDA English Language Development Standards Framework, 2020 Edition

WIDA has historically grounded its work in language development standards as a driver of equity for multilingual learners in curriculum, instruction, and assessment. This new edition reflects a continued commitment to these goals.

Starting in 2004, all editions of the WIDA English Language Development (ELD) Standards have reflected the belief that multilingual learners are best served when they learn content and language together in linguistically and culturally sustaining ways. The 2020 Edition recommits to this belief by maintaining the five original WIDA ELD Standards Statements while adding new and expanded resources to address updates in policy, theory, and practice.

WIDA Mission, Vision, and Values

WIDA draws its strength from its mission, vision, and values—the Can Do Philosophy, innovation, service, collaboration, and social justice. This belief system underscores the cultural, social, emotional, and experiential assets of multilingual learners, their families, and educators. It acts as a unifying force that gives the consortium its strength of conviction and action throughout the PreK-12 education community.

Mission
WIDA advances academic language development and academic achievement for children and youth who are culturally and linguistically diverse through high quality standards, assessments, research, and professional learning for educators.

From English Language Learners to Multilingual Learners

As part of its asset-based belief system, WIDA uses the term “multilingual learners” to describe all students who come in contact with and/or interact in languages in addition to English on a regular basis. They include students who are commonly referred to as English language learners (ELLs), dual language learners (DLLs), newcomers, students with interrupted formal schooling (SIFE), long-term English learners (L-TELs), English learners with disabilities, gifted and talented English learners, heritage language learners, students with English as an additional language (EAL), and students who speak varieties of English or indigenous languages.

Throughout the field of K-12 education, you will encounter various terms to describe multilingual learners. For example, ESSA (2015) uses the term “English learners” (ELs). For policy purposes, the five original WIDA ELD Standards Statements (2004) maintain the term “English language learners.” However, in an effort to encourage the field to use terminology that is asset-based and inclusive, WIDA began to use the term “multilingual learners.” You will see this term used throughout this document, starting with the Guiding Principles of Language Development on the next page.
WIDA Guiding Principles of Language Development (2019)

The updated Guiding Principles of Language Development exemplify the overarching and ever-present WIDA Can Do Philosophy and emphasize the importance of language in learning. They highlight the four Big Ideas of the 2020 Edition.

1. Multilingual learners’ languages and cultures are valuable resources to be leveraged for schooling and classroom life; leveraging these assets and challenging biases help develop multilingual learners’ independence and encourage their agency in learning.

2. Multilingual learners’ development of multiple languages enhances their knowledge and cultural bases, their intellectual capacities, and their flexibility in language use.

3. Multilingual learners’ language development and learning occur over time through meaningful engagement in activities that are valued in their homes, schools, and communities.

4. Multilingual learners’ language, social-emotional, and cognitive development are inter-related processes that contribute to their success in school and beyond.

5. Multilingual learners use and develop language when opportunities for learning take into account their individual experiences, characteristics, abilities, and levels of language proficiency.

6. Multilingual learners use and develop language through activities which intentionally integrate multiple modalities, including oral, written, visual, and kinesthetic modes of communication.

7. Multilingual learners use and develop language to interpret and access information, ideas, and concepts from a variety of sources, including real-life objects, models, representations, and multimodal texts.

8. Multilingual learners draw on their metacognitive, metalinguistic, and metacultural awareness to develop effectiveness in language use.

9. Multilingual learners use their full linguistic repertoire, including translanguaging practices, to enrich their language development and learning.

10. Multilingual learners use and develop language to interpret and present different perspectives, build awareness of relationships, and affirm their identities.
Big Ideas of the WIDA ELD Standards Framework, 2020 Edition: Kindergarten–Grade 12

This 2020 Edition of the WIDA ELD Standards Framework is anchored by four Big Ideas that are interwoven throughout the document. Like the Can Do Philosophy, they support the design of standards-based educational experiences that are student-centered, culturally and linguistically sustaining, and responsive to multilingual learners’ strengths and needs.

Big Ideas in the 2020 Edition

- **EQUITY** of Opportunity and Access
- **INTEGRATION** of Content and Language
- **COLLABORATION** among Stakeholders
- **FUNCTIONAL APPROACH** to Language Development
Equity of Opportunity and Access

WIDA's philosophy is rooted in equity and a commitment to supporting high-quality education for multilingual learners. This support for educational excellence is evident in WIDA's vision, mission, and values—innovation, service, the Can Do Philosophy, collaboration, and social justice. As a WIDA value, social justice includes creating positive change, challenging discriminatory actions (i.e., in terms of language, culture, and race), and promoting equity to improve the education of multilingual children, youth, and families.

Multilingual learners come from a wide range of cultural, linguistic, educational, and socioeconomic backgrounds and have many physical, social, emotional, experiential, and/or cognitive differences. All bring assets, potential, and resources to schools that educators must leverage to increase equity in standards-based systems. Increasing avenues of access, agency, and equity for all multilingual learners—including newcomers, students with interrupted formal schooling (SIFE), long-term English learners (L-TELs), students with disabilities, and gifted and talented English learners—requires educators to be knowledgeable, skillful, imaginative, and compassionate.

The 2020 Edition of the WIDA ELD Standards Framework is here to guide educators to

- Set high expectations for all students
- Provide access for multilingual learners to rich, standards-based, grade-level content, including by scaffolding up (see the WIDA website for resources about scaffolding)
- Enact linguistically and culturally sustainable pedagogies
- Create opportunities for multilingual learners to
  - engage actively with each other in deep learning
  - access and use multiple languages, including through translanguaging

When designing and delivering standards-based curriculum, instruction, and assessment, educators should consider multilingual learners’

- Previous personal and educational experiences
- Recency of arrival in the United States, if applicable
- Diverse cognitive and behavioral strengths, needs, and abilities
- Home and community
- Languages and cultures

Drawing on students' linguistic and cultural resources is essential to helping them navigate life in a diverse world, in addition to supporting them in meeting demands of academic content areas as they advance through school.

The 2020 Edition of the WIDA ELD Standards Framework upholds the goal of increasing equity for multilingual learners by providing common and visible language expectations in relation to grade-level academic content. These expectations also serve to increase coherence of policy and practice around the education of multilingual learners at federal, state, and local levels.

Integration of Content and Language

By content-language integration, we mean that multilingual learners develop content and language concurrently, with academic content as a context for language learning and language as a means for learning academic content.

The 2020 Edition introduces several new ways of looking at the integration of content and language, for example, through Key Language Uses, Language Expectations, and Correspondence Tables for Content and Language Standards (Appendix B); all these (and more) are introduced later in this document.

Multimodality, the use of multiple means of communication, is an essential way for all students to access and engage in the content areas. In addition to the use of spoken and written language, students also communicate through gestures, facial expressions, images, equations, maps, symbols, diagrams, charts, videos, graphs, computer-mediated content, and other means.

In positioning the 2020 Edition to spotlight the variety of ways in which language is used in content area learning, WIDA is drawing educators’ attention to multimodality, the use of multiple means of communication. Multimodality is inherent to and essential for how students make meaning and engage in disciplinary practices. All students are able to both interpret and express ideas with greater flexibility when using multimodal resources, including multiple languages. Multimodality allows all students to use multiple means to engage, interpret, represent, act, and express their ideas in the classroom. For example, as students read, they also might refer to illustrations or diagrams, and as students write, they might also represent their ideas numerically or graphically.

The integration of content and language for multilingual learners promotes

- Understanding the connections between content and language
- Making meaning within and across content areas (disciplines)
- Interaction of students with each other in challenging content activities
- Coordination of design and delivery of curriculum, instruction, and assessment

Collaboration among Stakeholders

Districts and schools are complex educational systems with collaboration extending across stakeholders from classrooms, to schools, districts, and the families and communities of students. Stakeholders have different areas of expertise and are often responsible for different aspects of educational planning and delivery; however, collectively they are responsible for the success of multilingual learners.

It is crucial for the academic success of multilingual learners that both language and content teachers and administrators see themselves as responsible for fostering the language development of multilingual learners, and for systems to move away from the idea that language specialists alone should assume sole responsibility for students’ language development.
Although different classrooms may have different instructional foci, all classrooms with multilingual learners must incorporate content and language development. Content teachers bring expertise in their discipline, while language teachers bring expertise in language development. Each teacher can contribute to deliver coordinated educational experiences for multilingual learners according to their own qualifications and areas of expertise. With sustained collaboration, language teachers expand their understanding of different content areas, and content teachers develop insights into and respond to the language development needs of multilingual learners.

Content and language teachers can work together to

• Plan and deliver grade-level standards-based instruction
• Plan for systematic, explicit, and sustained language development alongside the academic demands of the content areas
• Support one another
• Share unique fields of expertise

In this way, multilingual learners and their families benefit from a coherent and shared understanding of expectations and common goals for learning.

**Functional Approach to Language Development**

What does WIDA mean by a functional approach to language development? One metaphor for language is a toolbox, containing different tools that are used to communicate, to develop relationships, and to act upon the world. Like any good toolbox, the language toolbox contains various tools that function for different needs. Particular linguistic tools achieve certain purposes. For example, we make choices with language to reflect the topic at hand, the social roles and identities of those involved (am I talking to a college admissions interviewer or to my best friend?), and the needs of our listeners and readers. We make choices with language to organize our ideas in particular ways, to convey the relationships among these ideas, and about what types of words are most effective for our message. The explicit teaching of how language works can help multilingual learners expand what they can do with language, thereby growing their language toolbox. The result is that students become increasingly aware and strategic in their use of language to negotiate meaning and achieve their purposes in various contexts.

To read more about all these Big Ideas, see the WIDA website.
Understanding the WIDA ELD Standards Framework

Underpinned by the four Big Ideas, the WIDA ELD Standards Framework is a language development standards framework for K-12 academic settings.

Sometimes people describe a standards framework as being like a map. In the same way that a map points out common, visible landmarks, a standards framework points out common, visible expectations for all students and helps to bring coherence across educational systems. The WIDA ELD Standards Framework is like a map in that it offers language expectations as destination points, as well as road signs to set goals for curriculum, instruction, and assessment for multilingual learners.

The WIDA ELD Standards Framework consists of four components, each explored in the following pages. These four components are like building blocks of language development, and range from broad to narrow in scope. They work together to make a comprehensive picture of language development:

- **Five WIDA ELD Standards Statements** provide the broadest conceptual framing and illustrate the integration of content and language. The standards statements show language use in the service of learning—in other words, language for thinking and doing. They address the language of schooling.
- **Key Language Uses** describe prominent ways that language is used in school, across all disciplines. When educators make choices about how to integrate content and language, the Key Language Uses can help provide focus and coherence.
- **Language Expectations** set goals for content-driven language learning. They add specificity to the ELD Standards Statements and Key Language Uses and make visible the language associated with the content areas. Language Expectations are the statements most similar to what educators generally find in academic content standards.
- **Proficiency Level Descriptors** (PLDs) describe a continuum of language development for activities that target Language Expectations. They provide a detailed articulation of how students might develop language across the six levels of English language proficiency.

The figure below shows the four components of the framework conceptualized as nested building blocks of language development within sociocultural contexts.
## The WIDA ELD Standards Statements

The five standards statements represent the language of schooling and provide the broadest conceptual framing of content and language integration.

Each standard is shown in an abbreviated form in the table below. Hence *ELD Standard 2: English language learners communicate information, ideas, and concepts necessary for academic success in the content area of Language Arts* is abbreviated as *Language for Language Arts* and its reference code is *ELD-LA*.

<table>
<thead>
<tr>
<th>Abbreviated forms of the Five English Language Development Standards Statements</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>ELD Standard 1:</strong> Language for Social and Instructional Purposes (ELD-SI)</td>
</tr>
<tr>
<td><strong>ELD Standard 2:</strong> Language for Language Arts (ELD-LA)</td>
</tr>
<tr>
<td><strong>ELD Standard 3:</strong> Language for Mathematics (ELD-MA)</td>
</tr>
<tr>
<td><strong>ELD Standard 4:</strong> Language for Science (ELD-SC)</td>
</tr>
<tr>
<td><strong>ELD Standard 5:</strong> Language for Social Studies (ELD-SS)</td>
</tr>
</tbody>
</table>

These abbreviated forms point to WIDA’s functional approach to language development, drawing attention to:

- The dynamic nature of language
- Communicative purposes of the discipline or content area
- The use of language to communicate and make meaning
- Language use in the service of learning—in other words, language for thinking and doing

### Standard 1

ELD Standard 1, Language for Social and Instructional Purposes, is broader in scope and applicability than the other four ELD Standards Statements that are associated with discipline-specific learning. ELD Standard 1 applies across a range of educational settings, and works both independently from and in conjunction with ELD Standards 2-5. Students communicate to learn but also to convey personal needs and wants, to affirm their own identities, and to form and maintain relationships.

ELD Standard 1 encompasses the experiential, linguistic, and cultural backgrounds and identities of multilingual learners in relation to the other ELD Standards. It draws attention to multilingual learners’ positioning in the world that informs their meaning-making in the content areas. It reminds educators of strength-based approaches that meet students where they are in their own contexts, and to bridge the personal, social, and emotional to the academic.
Standard 1 encompasses multilingual learners’ use of language in the following situations:

- **As they expand their linguistic repertoire from English language proficiency level 1 to level 6.** ELD Standard 1 is not just for newcomers and young children, and it is not a precursor to learning disciplinary language. Rather, it encompasses opportunities for multilingual learners to develop language for social and instructional purposes at all language proficiency levels, all grade levels, and in all content areas.

- **Across all disciplines and school settings.** Language for social and instructional purposes is foundational for engagement and learning in every discipline—from core disciplines like language arts and mathematics—to visual and performing arts; health and physical education; cross-disciplinary endeavors like use of technology, and library/media center time; and school-wide activities and events. Language is a part of the entire school day and all educators share responsibility for engaging multilingual learners in rich opportunities to simultaneously learn content and language.

- **Across numerous topics, tasks, and situations.** ELD Standard 1 presents Language Expectations that apply to a range of activities and interactions. Some examples include setting classroom norms; establishing routines; following procedures; asking for clarification; discussing with peers; relating personal ideas, feelings, and views; and exploring languages, cultures, and perspectives.

- **While interacting with others.** Language is, after all, a social practice that is dependent on an awareness of one’s own and others’ identities, as well as the unique roles and purposes that participants have in communicating with different members of a learning community—including peers, teachers, administrators, counselors, paraprofessionals, interpreters, family and community liaisons, other support staff, and visitors to the school. Interactive learning increases opportunities for multilingual learners to engage fully in content learning and leverage their assets as support for their academic achievements.
Key Language Uses

As part of developing the WIDA ELD Standards Framework, 2020 Edition, WIDA researchers analyzed academic content standards, research literature, and disciplinary practices. They also incorporated an understanding of genre families—categories of texts that share specific characteristics, such as purpose, organization, or other similar patterns of language use. From this research, WIDA has identified four Key Language Uses—Narrate, Inform, Explain, and Argue—that can be used to prioritize and organize the integration of content and language.

Key Language Uses exemplify the Big Idea: Functional Approach to Language Development. They emphasize language use for particular purposes, with particular audiences, and in particular sociocultural contexts. They

• Bring focus and coherence to the language of schooling
• Help educators make choices to prioritize and coordinate content and language integration
• Serve as an organizing principle for the Language Expectations

WIDA recognizes that Key Language Uses are one of many different configurations for connecting content to language through standards. The increased emphasis on genre-centered pedagogy (teaching that highlights genres as a way of organizing language use) provides a natural point for collaboration between content and language educators, with Key Language Uses serving as a focus for that partnership.

Key Language Uses share some common aspects across disciplines, and yet each discipline also has unique ways of applying each. Below are brief definitions for each Key Language Use.

• **Narrate** highlights language to convey real or imaginary experiences through stories and histories. Narratives serve many purposes, including to instruct, entertain, teach, or support argumentation.
• **Inform** highlights language to provide factual information. As students convey information, they define, describe, compare, contrast, organize, categorize, or classify concepts, ideas, or phenomena.

---

1 WIDA Key Language Uses have been updated: their definition is refined in the 2020 Edition to mean genre families. “Recount” has been separated into “Narrate” and “Inform.” “Discuss” is not a genre family, but it is threaded throughout all Key Language Uses and applies across all five ELD standards.
• **Explain** highlights language to give an account for how things work or why things happen. As students explain, they substantiate the inner workings of natural, man-made, and social phenomena.

• **Argue** highlights language to justify claims using evidence and reasoning. Argue can be used to advance or defend an idea or solution, change the audience’s point of view, bring about action, or accept a position or evaluation of an issue.

Key Language Uses can overlap and inform each other. Key Language Uses should not be considered strict categorical divisions. As genre families, Key Language Uses can intersect, blend, and build on each other. For example, as students develop complex explanations, they may inform (by naming, defining, describing, or comparing and contrast something), and even narrate (e.g., by including an anecdote) as they work to help their audiences accurately understand the how or why of a concept (Explain). Narratives can be embedded within other expository structures, such as those in the families of Argue and Explain. Argue can incorporate elements of many Key Language Uses, as it seeks to show an audience the validity of a position or claim.

All Key Language Uses are present across all grade levels and disciplines, and yet at each grade-level cluster and discipline, some are more prominent than others. The emphasis placed on these four Key Language Uses is not intended to restrict curriculum and instruction; rather, it accentuates the most prominent genre families as an organizing principle for the ELD Standards. **The most prominent Key Language Uses are the basis for its Language Expectations.**

**Genres** are multimodal types of texts (oral, written, visual) that recur frequently for specific purposes, with specific discourse organization and language features (e.g., biographies).

Genres with similar characteristics (e.g., biographies, autobiographies, short stories) can be grouped together into **genre families** (e.g., narrate).

**Key Language Uses** reflect the most high-leverage genre families across academic content standards. They are **Narrate, Inform, Explain, and Argue.**

**Key Language Uses can overlap and inform each other.**

As genre families, Key Language Uses can intersect, blend, and build on each other.

**All Key Language Uses are present across all grade levels and disciplines.**

The emphasis placed on these four Key Language Uses is not intended to restrict curriculum and instruction; rather, it accentuates the most prominent genre families as an organizing principle for the ELD Standards.

---

*The complete edition of the WIDA ELD Standards Framework provides a deep dive into the features of each Key Language Use across grades and disciplines. Visit Section 4: Resources—Key Language Uses: A Closer Look, and also Appendix C, which shows K-12 distribution tables of the most prominent Key Language Uses by grade-level cluster and WIDA ELD Standard.*
Language Expectations

Language Expectations are goals for content-driven language instruction, adding specificity to the ELD Standards Statements and Key Language Uses. They are the statements most similar to what educators generally find in academic content standards. We’d like to call your attention to three aspects of Language Expectations: their reference codes, communication modes, Language Functions, and example Language Features.

Language Expectations: Reference Code

As illustrated in the figure below, each Language Expectation has a reference code that includes the WIDA ELD Standard Statement (incorporating an academic content area), grade-level cluster, Key Language Use, and communication mode.

Example Reference Code for a Language Expectation

**Mode of Communication:** Expressive

**Key Language Use:** Narrate

**Grade-Level Cluster**

**ELD Standard:** Language for Language Arts

**ELD-LA.2-3.Narrate.Expressive:** Multilingual learners construct language arts narratives that
- Orient audience to context
- Develop story with time and event sequences, complication, resolution, or ending
- Engage and adjust for audience

Language Expectations: Communication Modes

In the Language Expectations, the four individual language domains (listening, speaking, reading, and writing) are consolidated into two more inclusive modes of communication: interpretive and expressive.

- The interpretive communication mode encompasses listening, reading, and viewing
- The expressive communication mode encompasses speaking, writing, and representing
These two broader modes of communication (interpretive and expressive) increase accessibility options for students and emphasize multimodal forms of communication (namely, by adding viewing in conjunction with listening and reading as well as representing in conjunction with speaking and writing).

Language Expectations: Language Functions and Features

Developed from a systematic analysis of academic content standards, Language Expectations are built around a set of Language Functions. Language Functions are common patterns of language use that showcase particular ways students might use language to meet the purposes of schooling. For example, a series of Language Functions is associated with the process of constructing fictional narratives, informing peers of newly gained knowledge, explaining phenomena, or engaging in scientific argumentation.

The table on the next page presents the Language Expectation for ELD-LA.2-3.Narrate.Expressive. It contains three Language Functions that highlight common patterns of language use associated with Language Arts narratives in grades 2-3:

- Orient audience to context
- Develop story with time and event sequences, complication, and resolution
- Engage and adjust for audience

Reminder: the most prominent key language uses are the basis for its language expectations.
In order to carry out particular Language Functions, language users rely on various language resources, including Language Features (e.g., types of sentences, clauses, phrases, and words). Together, the Language Functions and Features form a dynamic and illustrative set that shows some of the ways language works in service of content learning. The table below shows the Language Features that accompany the second Language Function from the Language Expectation ELD-LA.2-3.Narrate. Expressive.

### The Anatomy of a Language Expectation

</tr>
<tr>
<td>• Pronouns, renaming, and synonyms to reference characters, situations, or ideas across the text (<em>Miguel=my little brother=he; that night=the worst night</em>)</td>
</tr>
<tr>
<td>• Connectors to sequence time (<em>first, next, and then</em>), and events (<em>before, after, later</em>), and to combine and link event details (<em>and, but, so</em>)</td>
</tr>
</tbody>
</table>

This close integration of content and language invites collaboration between content and language educators as they collectively share responsibility for teaching multilingual learners. Language development is its own field of expertise, just as each discipline is. As content and language teachers dive deeper into standards-based planning and delivery of instruction, language specialists can help content teachers learn more about Language Functions and Features. Similarly, content teachers can help language specialists connect to content learning.
Proficiency Level Descriptors

Proficiency Level Descriptors (PLDs) are a detailed articulation of multilingual learners’ growth in interpretive and expressive language across levels of English language proficiency.

PLDs describe how multilingual learners use language toward the end of each language proficiency level (PL) until they reach PL6. PL6 is open ended: it indicates that for all of us, language development continues throughout life. Each end-of-level descriptor includes and builds on previous proficiency levels (e.g., PL4 = PL1 + PL2 + PL3 + PL4). Educators should scaffold learning and resources across all levels of language proficiency.

For the purposes of representation and understanding, PLDs describe proficiency in a linear way. However, language development is not a straightforward linear process across proficiency levels; it is contingent on a variety of factors, including multilingual learners’ familiarity with the topic, audience, and situation. Therefore, multilingual learners may take various paths to develop and reach Language Expectations.

At any given point along their continua of language development, multilingual learners may demonstrate a range of abilities within and across each proficiency level. For example, they may speak at a higher proficiency level while write at an earlier proficiency level. A proficiency level does not categorize a multilingual learner (e.g., ‘a PL1 student’), but, rather, identifies snapshots of what a multilingual learner knows and can do at a particular stage of language development (e.g., ‘a student at PL1’ or ‘a student whose listening performance is at PL1’).

PLDs maintain consistency with the K-12 Performance Definitions of the 2012 edition of the WIDA ELD Standards. As such, the PLDs continue to be written according to the three dimensions of language use: discourse, sentence, and word/phrase.

The Dimensions of Language Use

The dimensions of language use are one way to conceptualize the linguistic system within a sociocultural context. Language users make choices in all three dimensions of language that contribute to how a text is purposely constructed to have the desired effect on its intended audience(s).
The **discourse dimension** imparts overall meaning across an entire text, supported by the sentence and word/phrase dimensions. To consider how a language user constructs a meaningful message, begin by looking at the discourse dimension and the overarching message to see how language is organized to communicate particular ideas, how language holds ideas together in a text (its cohesion), and how loosely or tightly language is packed (its density).

The **sentence dimension** contributes to the grammatical complexity of a text. Language users make choices in how they express ideas and their interrelationships through clauses in various sentences types. These also help shape how a text is sequenced and connected.

The **word/phrase dimension** adds precision to communication. For example, language users strategically select everyday, cross-disciplinary, or technical language; employ multiple meanings and nuances of words and phrases; or play with their shades of meaning.

### Dimensions of Language within a Sociocultural Context

- **Everyday language**: language for representing ideas in nontechnical ways (e.g., dogs instead of canines)
- **Cross-disciplinary language**: common academic language used across content area contexts (e.g., analyze, evaluate, summarize)
- **Technical language**: specialized language associated with a content area such as science and history (e.g., mitosis, imperialism)

The table on the next page updates the Features of Academic Language table (WIDA, 2014). It delineates five criteria across the three dimensions of language, framed within a sociocultural context. In addition to the dimensions and their criteria, the column to the far right presents sample features found in the PLDs.
### Dimensions of Language in the Proficiency Level Descriptors:
**Criteria Foci and Sample Language Features**

The three language dimensions operate within sociocultural contexts for language use.

<table>

</tbody>
</table>
Applicable Uses of the WIDA Proficiency Level Descriptors

Below are some non-exhaustive examples of ways the PLDs may be used.

The PLDs might be used during

• Collaboration between language development and content area educators
• Professional learning activities about language development
• School team discussions about the language growth of multilingual learners
• Conversations with families in their preferred language

The PLDs might be used to

• Help design and scaffold classroom instruction and assessment tasks—as one tool among others
• Support teacher and student discussions around language performance in relation to learning goals
• Monitor progress of multilingual learners as they show language growth over time
• Evaluate evidence from student work (portfolio of speaking and writing samples) as part of the eligibility process for special services

Inapplicable Uses of the WIDA Proficiency Level Descriptors

The PLDs should not be used as restrictive examples or as a finite list of student abilities. Nor should they be used to limit access to complex texts and grade-level materials, participation in rigorous learning, or engagement in meaningful classroom discussions. Finally, the grade-level cluster PLDs should not be used to lower expectations or slow student growth.

PLDs should not be used as the single document or as the only evidence in high-stakes situations such as

• Identification for special education services; for example in trying to obtain cognitive support services solely based on a student’s English language proficiency level
• Description of cognitive ability
• Identification of student readiness abilities
• Tracking for remediation or enrichment
• Grading in report cards
• Consideration for grade placement or retention
• Evaluation of teachers

The Proficiency Level Descriptors should not be used as a sole source to define or categorize a multilingual learner or teacher.
The WIDA ELD Standards Framework: What It is and What It is Not

The WIDA ELD Standards Framework, together with cross-disciplinary academic content standards and disciplinary practices, defines the language multilingual learners need as they move toward college, career, and civic readiness.

The WIDA ELD Standards Framework does not—indeed, cannot—enumerate all or even most of the language of school. Use of the Standards Framework must therefore be complemented by a well-developed, content-rich curriculum and effective pedagogical approaches within an equitable educational program for multilingual learners (See the full WIDA ELD Standards Framework, Section 4: Resources—Collaborative Planning for Content and Language Integration: A Jump-Off Point for Curricular Conversations).

Kindergarten Materials

WIDA recognizes that English language development occurs over multiple years, is variable, and depends on many factors, such as multilingual learners’ ages, maturation, classroom experiences, motivation, attitudes, and types of educational programming.

With this in mind, we have developed sets of materials that are appropriate for students in different grade-level clusters (K, 1, 2-3, 4-5, 6-8, and 9-12). Within each grade-level cluster section, the materials are organized according to the components of the WIDA ELD Standards Framework, and include some additional resources. The grade-level cluster materials help educators enact the WIDA ELD Standards Framework.
Entering kindergarten is a big milestone for many children and their families. Children develop in different ways and at different rates, but in general, kindergartners tend to be quite active—playing, running, enjoying being silly, and making friends. Around this time, young children learn many new skills, from hopping on one foot, to holding a pencil, cutting with scissors, and recognizing colors, shapes, numbers, and letters. As kindergartners develop in social–emotional ways, they are also beginning to learn academic concepts through language and other multimodal means of communication.

The physical, hands-on world of kindergartners fosters their language development. Make-believe, singing, dancing, and playing games create natural connections between school and home, where, bolstered by their families, multilingual learners interact in multiple languages and draw on their cultures and experiences to express feelings, tell stories, and enter the world of print.

In this section you can find detailed, grade-level cluster specific information about the WIDA ELD Standards Framework. Remember that the WIDA ELD Standards Statements are the same from kindergarten through grade 12. Then, you will find the following materials for kindergarten:

- The most prominent Key Language Uses
- Language Expectations, Language Functions, and Language Features
  - Annotated Language Samples illustrating WIDA ELD Standards Statements, Language Expectations, Functions, and Features in authentic kindergarten texts
- Proficiency Level Descriptors
Key Language Uses

Key Language Uses—Narrate, Inform, Explain, and Argue—are present across all grade levels and disciplines. The table below offers snapshots of some ways students engage in each Key Language Use throughout kindergarten.

Language Expectations, Functions, and Features

Language Expectations

Language Expectations are interpretive and expressive goals for content-driven language learning. They articulate the language necessary for meeting academic content standards.

Language Functions

Language Expectations are built around a set of Language Functions. Language Functions highlight common patterns of language use, showcasing particular ways students might use language to meet the purposes of schooling. For example, a series of Language Functions is associated with the process of constructing fictional narratives, informing peers of newly gained knowledge, explaining phenomena, or engaging in scientific argumentation. In the figure on the next page, you can see that the Language Functions are listed in bulleted form, under the interpretive and expressive Language Expectations.

Standard 1 Language Expectations and Language Functions

Given its broad scope and applicability, Language Expectations and Language Functions for Standard 1 (Language for Social and Instructional Purposes) are presented in two wide-ranging spans, the first for grades K-3 and the second for grades 4-12. These are logical divisions between early childhood education and upper elementary years and beyond. Language Expectations and Functions for Standard 1 can be readily interwoven or paired with those in Standards 2-5 (Language for Language Arts, Mathematics, Science, and Social Studies). The pairing of Standard 1 with Standards 2-5 reminds us that students communicate as part of disciplinary learning, but also to convey personal needs and wants, to affirm their own identities, and to form and maintain relationships.

Language Features

The Language Functions of Standards 2-5 are further delineated with Language Features. In the figure on the next page, you can see sample Language Features for each Language Function, marked with a box (■). Language Features are examples of various language resources that carry out particular Language Functions, such as different types of sentences, clauses, phrases, and words. Due to the intertwining nature of Standard 1 with Standards 2-5, there are no specific Language Features for Standard 1.

In the example here, you can see how the Language Features connect to the Language Functions in the expressive Language Expectations. Language Features are only shown in the expressive functions because those also help us see how learners have processed information through interpretive modes. For example, when multilingual learners share information about something they have heard, read, or viewed, we can use their expressive language skills to evaluate and guide our instructional choices.

The figure on the next page shows how the Language Functions and Language Features appear.
## Kindergarten Language Functions and Language Features

### WIDA ELD STANDARD 2

#### Language for Language Arts

**Language Expectations:** Multilingual learners will...

<table>
<thead>
<tr>
<th>ELD-LA.K.Inform.Interpretive</th>
<th>ELD-LA.K.Inform EXPRESSIVE</th>
</tr>
</thead>
<tbody>
<tr>
<td>Interpret informational texts in language arts (with prompting and support) by</td>
<td>Construct informational texts in language arts (with prompting and support) that</td>
</tr>
<tr>
<td>- Identifying main topic and key details</td>
<td>- Introduce topic for audience</td>
</tr>
<tr>
<td>- Asking and answering questions about descriptions of familiar attributes and characteristics</td>
<td>- Describe details and facts</td>
</tr>
<tr>
<td>- Identifying word choices in relation to topic or content area</td>
<td></td>
</tr>
</tbody>
</table>

### Language Functions and Sample Language Features

**Introduce topic for audience through...**

- Pictures, words, title to identify topic
- Pronouns to reference entity (*farmers=they*)
- Oral recounting to share information (*The farmers grow food.*)

**Describe details and facts through...**

- Nouns to label visuals (*fruit, oranges*)
- Verbs to label actions (*farming*)
- Prepositional phrases to tell about where (*on the farm, in the trees*)
- Visuals (labeled drawings) to support information
The Language Expectations and Language Functions of Standard 1 are interwoven and paired with those of Standards 2-5. For this reason, remember that there are no specific Language Features for Standard 1, and that the expectations for the interpretive and expressive communication modes are the same. As you can see from the reference codes, the Language Expectations are the same for students in kindergarten through grade 3.

**Language Expectations:** Multilingual learners will...

### Narrate

**ELD-SI.K-3.Narrate**
- Share ideas about one’s own and others’ lived experiences and previous learning
- Connect stories with images and representations to add meaning
- Ask questions about what others have shared
- Recount and restate ideas
- Discuss how stories might end or next steps

### Inform

**ELD-SI.K-3.Inform**
- Define and classify objects or concepts
- Describe characteristics, patterns, or behavior
- Describe parts and wholes
- Sort, clarify, and summarize ideas
- Summarize information from interaction with others and from learning experiences
**WIDA ELD STANDARD 1**

**KINDERGARTEN**

Social and Instructional Language

**Language Expectations:** Multilingual learners will...

### Explain

**ELD-SI.K-3.Explain**

- Share initial thinking with others
- Follow and describe cycles in diagrams, steps in procedures, or causes and effects
- Compare and contrast objects or concepts
- Offer ideas and suggestions
- Act on feedback to revise understandings of how or why something works

### Argue

**ELD-SI.K-3.Argue**

- Ask questions about others’ opinions
- Support own opinions with reasons
- Clarify and elaborate ideas based on feedback
- Defend change in one’s own thinking
- Revise one’s own opinions based on new information
KINDERGARTEN

WIDA ELD STANDARD 2
Language for Language Arts

Narrate

Language Expectations: Multilingual learners will...

**ELD-LA.K.Narrate.Interpretive**
Interpret language arts narratives (with prompting and support) by
- Identifying key details
- Identifying characters, settings, and major events
- Asking and answering questions about unknown words in a text

**ELD-LA.K.Narrate.Expressive**
Construct language arts narratives (with prompting and support) that
- Orient audience to story
- Describe story events

Language Functions and Sample Language Features

**Orient audience to story through...**
- Pictures, words, title, simple statements, or common story expressions to introduce context
- Noun groups to state who or what the story is about (*tall man, baby bear*)
- Prepositional phrases to specify location and time (*at Grandma's house, by the river, in the winter, at night*)

**Describe story events through...**
- Verbs to describe character actions (*jumped*), feelings (*was sad*), behaviors (*eating*)
- Connectors to establish sequence (*then, after, and*)
- Pronouns and renaming to reference a character across the text (*the girl=she=Nancy*)
Language Expectations: Multilingual learners will...

**ELD-L.A.K.Inform.Interpretive**
Interpret informational texts in language arts (with prompting and support) by

- Identifying main topic and key details
- Asking and answering questions about descriptions of familiar attributes and characteristics
- Identifying word choices in relation to topic or content area

**ELD-L.A.K.Inform.Expressive**
Construct informational texts in language arts (with prompting and support) that

- Introduce topic for audience
- Describe details and facts

Language Functions and Sample Language Features

**Introduce topic for audience through...**

- Pictures, words, title to identify topic
- Pronouns to reference entity *(farmers=they)*
- Oral recounting to share information *(The farmers grow food.)*

**Describe details and facts through...**

- Nouns to label visuals *(fruit, oranges)*
- Verbs to label actions *(farming)*
- Prepositional phrases to tell about where *(on the farm, in the trees)*
- Visuals (labeled drawings) to support information
Language Expectations: Multilingual learners will...

**ELD-MA.K.Inform.Interpretive**
Interpret mathematical informational texts (with prompting and support) by
- Identifying concept or object
- Describing quantities and attributes

**ELD-MA.K.Inform.Expressive**
Construct mathematical informational texts (with prompting and support) that
- Define or classify concept or entity
- Describe a concept or entity
- Compare/contrast concepts or entities

Language Functions and Sample Language Features

**Define or classify concept or entity through...**

- Single nouns to represent class of things (*colors, shapes, patterns*)
- Relating verbs (*be, have*) to define, describe, or classify (*The pattern is red, blue, red, blue.*)

**Describe a concept or entity through...**

- Expanded noun groups to add specificity (*The red star has five points.*)
- Sequential signals (*first, second, then, last*) to describe patterns (*First is a green bear, then two blue bears.*)
- Prepositional phrases (*behind, on top of, under, next to, below, above*) to specify location (*The blue star is next to the green triangle.*)

**Compare/contrast concepts or entities through...**

- Comparison/contrast language (*both, same, different*) and pointing to differentiate between entities (*This pattern is different than that one.*)
- Causal language (*because, so*) and demonstration to provide reasoning (*I can make a triangle because I have three sticks.*)
KINDERGARTEN

WIDA ELD STANDARD 4

Language for Science

Language Expectations: Multilingual learners will...

<table>
<thead>
<tr>

<td>● Provide details about an entity</td>
</tr>
</tbody>
</table>

Language Functions and Sample Language Features

**Introduce others to a topic or entity through...**

- Pictures, words, drawings to introduce others to the topic
- Generalized nouns to identify class of things (*pollinators, insects*)
- Pronouns (*it, they*) to reference entity or idea (*insects=they*) (demonstratives identify that this is a plant)
- Oral recounting to share information (*The butterflies fly for a really long time.*)

**Provide details about an entity through...**

- Prepositional phrases to tell about where (*in the trees, on the flowers, next to, above, below*)
- Verbs to label actions (*fly, grow, eat*)
- Relating verbs (*be, have*) to define entity (*Butterflies are pollinators. Butterflies have antennae.*)
- Adjectives to add details (*red and black wings*)
- Pictures, labeled drawings, words to categorize, compare, and contrast information (*moths=night, butterflies=day*)
Language Expectations: Multilingual learners will...

**ELD-SC.K.Explain.Interpretive**
Interpret scientific explanations by
- Defining investigable questions or simple design problems based on observations and data about a phenomenon
- Using information from observations to find patterns and to explain how or why a phenomenon occurs

**ELD-SC.K.Explain.Expressive**
Construct scientific explanations that
- Describe information from observations about a phenomenon
- Relate how a series of events causes something to happen
- Compare multiple solutions to a problem

Language Functions and Sample Language Features

**Describe information from observations about a phenomenon through...**
- Single words to identify context (*floating, sinking*)
- Relating verbs (*have, be*) to state relationships or attributes
- Pictures, diagrams, to add information or illustrate phenomenon

**Relate how a series of events causes something to happen through...**
- Nouns to represent concepts (*investigation*)
- Simple sentences to describe the phenomenon (*A feather floats.)*
- Cohesion to reference ideas, people across text, including pronouns, articles, demonstratives (*it, a, the, this, that*)
- Causal connectors to combine ideas into logical relationships (*so, because, when/then*)
- Connectors to link or compare observations (*Paper floats but rocks sink.*)

**Compare multiple solutions to a problem through...**
- Simple statements to represent conclusions (*Heavy things float.*)
### Language Expectations: Multilingual learners will...

</tr>
</tbody>
</table>

### Language Functions and Sample Language Features

**Introduce topic associated with a compelling or supporting questions through...**

- Pictures, words, title to identify topic or concept (*My Neighborhood, Activities*)
- Visuals (labeled drawings, diagrams) to share information about topic attributes

**Provide a detail about relevant information through...**

- Nouns to label visuals or cultural items (*family members, weather words, food, events*)
- Verbs to label actions and activities (*dancing, cooking*)
- Prepositional phrases to tell about location (*on the block, in the house, next to the store, at Grandma’s house, on the bus*)
- Adjectives to add description to labeled nouns and simple sentences (*It is a sunny day.*)
Annotated Language Samples

Annotated Language Samples exemplify the WIDA ELD Standards Framework in action. In particular, they show an ELD Standards Statement, a Key Language Use, a Language Expectation, as well as its Language Functions and Language Features contextualized in authentic grade-level texts. The samples, drawn from the work of teachers and students from across the WIDA Consortium, help make more visible the language for content learning. In this way, educators can envision how to highlight language and plan for its systematic development during content learning.

LEGEND FOR THE ANNOTATED TEXTS

Several different conventions are used to indicate example Language Features in the annotated text:

- **Language Functions (bold white text on a blue background)**
- **Connectors, sequence words (in bold)**
- **Nouns and noun groups (in red with dashed underline)**
- **Verbs and verb groups (in green with dotted underline)**
- **Prepositional and adverbial phrases (in blue with diamond underline)**
- **Objective/evaluative language (words or phrases) (in italics)**
- **Cohesive devices (circles and arrows within the text)**
- **Clauses (underlined and italics)**
- **Sentences (highlighted with boxes around them)**

Note: Examples of sentences are declarative statements, statements of claims, statements foreshadowing events. See individual texts for more detail.
Annotated Language Sample

**Context:** This text was written by a multilingual kindergartner. At this time, students were writing every day about their lives or about books they were reading. This is the first of two texts presented here, written by the same kindergartner on two consecutive days. Both are modeled after a book the learner was reading.

**Prompt:** It’s story writing time!

**Language Expectation: ELD-LA.K.Narrate.Expressive**
Multilingual learners use language to construct language arts narratives (with prompting and support) that
- Orient audience to story
- Describe story events

### Functions & Features

<table>
<thead>
<tr>
<th>Orient audience to story through...</th>
<th>Describe story events through...</th>
</tr>
</thead>
<tbody>
<tr>
<td>Simple statements</td>
<td>Verbs (and verb groups)</td>

<td>• will wear</td>
</tr>
<tr>
<td>• Brather [brother]</td>
<td>Pronoun to reference characters</td>
</tr>
<tr>
<td>• Mother</td>
<td>• Brather ... he</td>
</tr>
</tbody>
</table>

**Example of Student Writing**

```
Brather is hopey [hoping].

Mother is hoee [home].

He will wear boots and a scarf.
```

```
Brather is hopey.

Momet is hopey.

He will wear boots and a scarf.
```
Annotated Language Sample

Context: This is the second text written by the same multilingual kindergartner (the first is on the previous page). The student had been reading informational books about animals.

Prompt: “Ok friends, it’s writing time! Get out your notebooks and pencils. Remember you can write about books you are reading.”

Language Expectation: ELD-SC.K.Inform.Expressive
Multilingual learners use language to construct scientific informational texts that
• Introduce others to a topic or entity
• Provide details about an entity

<table>
<thead>
<tr>
<th>Functions &amp; Features</th>
<th>Functions &amp; Features</th>
</tr>
</thead>
<tbody>

</tr>
</tbody>
</table>

A gosling has a wing.
A piglet has a tail.

A calf has a nose.

... This horse is fast. This duck and this pig are slow.

Example of Student Writing
Proficiency Level Descriptors

Remember...

Proficiency Level Descriptors (PLDs) illustrate a continuum of language development for multilingual learners across six levels of English language proficiency for each grade-level cluster. The descriptors span three dimensions of language: discourse, sentence, and word/phrase.

• Each proficiency level (PL) includes and builds on previous levels (e.g., PL4 = PL1 + PL2 + PL3 + PL4). PL6 is open-ended. It indicates that for all of us, language development continues throughout life.

• Language development is not a straightforward linear process across proficiency levels; it is contingent on a variety of factors. Multilingual learners may take various paths to develop language.

• The PLDs are designed to be used in coordination with Language Expectations, Language Functions, and Language Features.

  • Whereas Language Expectations offer goals for how all students might use language to meet academic content standards, PLDs offer a succinct description of how multilingual learners might develop language across levels of language proficiency in moving toward meeting Language Expectations.

  • In the PLDs, text is multimodal, including oral, visual, and written forms.

  • Scaffolding learning increases accessibility for multilingual learners, supports and bolsters their opportunities to meaningfully engage in grade-level content learning, and builds toward independence. The PLDs are predicated on the idea that appropriate scaffolding supports students in moving through the language proficiency levels.
Grade K WIDA Proficiency Level Descriptors for the Interpretive Communication Mode (Listening, Reading, and Viewing)

Toward the end of each proficiency level, when scaffolded appropriately, multilingual learners will...

Collaborative Planning for Content and Language Integration: A Jump-Off Point for Curricular Conversations

The WIDA ELD Standards Framework, working in tandem with academic content standards, defines the language multilingual learners need as they engage in learning and prepare for college, career, and civic lives. The framework upholds the goal of increasing equity for multilingual learners by promoting a culturally and linguistically sustaining approach to education and by providing common and visible language expectations in relation to grade-level academic content. Attending to how students use language in learning acknowledges that all learners are language learners, and all teachers are language teachers. For multilingual students, this attention to language use is especially critical.

One of the framework’s functions is to serve as a guide for informing the design of curriculum and instruction for multilingual learners. To support this important work, we offer a springboard for discussion around collaborative planning for curricular integration of content and language. This example showcases initial steps educators can take to use components of the WIDA ELD Standards Framework to promote language development in content units of learning. Please visit the complete WIDA ELD Standards Framework, 2020 Edition, to consult the full section supporting collaborative curricular planning.
### The Destination: Setting Unit-Level Goals

<table>
<thead>
<tr>
<th>Steps</th>
<th>Guiding Questions</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Locate relevant <strong>WIDA ELD Standards</strong> by examining the unit’s content standards</td>
<td>What content (e.g., disciplinary practices, concepts, topics) are students expected to learn?</td>
</tr>
</tbody>
</table>
| 2. Identify the most prominent **Key Language Uses** by analyzing the unit’s content standards, summative assessments, essential questions, and main learning events | - How are students being asked to use language in the unit?  
- What **Key Language Uses** best reflect how students will interact with language? |
| 3. Use **Language Expectations** to create unit language goals | What **Language Expectations** best reflect the language focus of the unit? |
| 4. Unpack the **Language Expectations, Functions, and Features** in the context of your unit | What **Language Functions and Features** are essential for meeting content and language goals and the end-of-unit assessment? |

### Getting There: Sequencing and Scaffolding Daily Lessons

Considering the Language Expectations, Functions, and Features, sequence and adapt lesson plans for continuous language development and active scaffolding of student learning.
